**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/20/2007 has been entered.

2. The Amendment filed by Applicant on 06/20/2007 has been entered.

3. The rejection of claims 1, 14, 17, 19, 23, 33, 37 and 38 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn.

Art Unit: 1713

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1, 3-12, 20 and 22-31 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Esselborn et al. U.S. Patent No. 6,248,839 (hereinafter "Esselborn") in view of Inaoka et al., US 2005/0080298 (hereinafter "Inaoka"). Esselborn teaches a mercapto-containing block copolymers having polymethacrylic acid and polyalkylene oxide repeating groups.

Art Unit: 1713

See Abstract; col. 6, lines 14-21; Example 1A. Although Esselborn makes it clear that the block copolymer can be used as products as dispersants in aqueous media, Esselborn does not specifically teach use with cement. Inaoka teaches in analogous art polyalkylene oxide polymers used in cement dispersions. Inaoka paragraph 0041. In view of Inaoka, one having an ordinary skill in the art would be motivated to modify Esselborn by using adding the block copolymer to a cement dispersion because the use of polyalkylene oxide polymers used in cement dispersions is common and Inaoka makes it clear to one of ordinary skill that polyalkylene oxide is a known dispersant in cement. Such modification would be obvious because one would expect that the use of mercapto-containing block copolymers having polymethacrylic acid and polyalkylene oxide repeating groups as taught by Esselborn would be similarly useful and applicable to the cement dispersion taught in Inaoka.

7. In order to remove Inaoka as a prior art reference, the Applicant must submit a verified translation of the foreign priority document. The Examiner disagree with the Applicant's analysis the present mechanism is outside the scope of Esselborn.
